

Cyphlab Task DB API Documentation

This documentation covers all backend routes for the Project & Team Task Management Platform.

Base URL: `/api`

Authentication (`/api/auth`)

Method	Endpoint	Description	Role Required	Body / Params
POST	<code>/auth/register</code>	Register a new user	None	<code>{ name, email, password, role? }</code>
POST	<code>/auth/login</code>	Login to receive a JWT	None	<code>{ email, password }</code>
POST	<code>/auth/logout</code>	Logout (Stateless token removal)	Any Authenticated	None
GET	<code>/auth/me</code>	Get currently logged-in user profile	Any Authenticated	None

Users (`/api/users`)

Note: All endpoints here require the `ADMIN` role.

Method	Endpoint	Description	Role Required	Body / Params
GET	<code>/users/</code>	Get list of all users	ADMIN	None
POST	<code>/users/</code>	Create a new user	ADMIN	<code>{ name, email, password, role }</code>
PUT	<code>/users/:id</code>	Update an existing user	ADMIN	<code>{ name, email, role }</code>
DELETE	<code>/users/:id</code>	Delete a user	ADMIN	URL param: <code>id</code>

Projects (`/api/projects`)

Method	Endpoint	Description	Role Required	Body / Params
GET	<code>/projects/</code>	Get projects (Filtered by user's role/assignments)	Any Authenticated	None
GET	<code>/projects/:id</code>	Get details of a specific project	Any Authenticated *	URL param: <code>id</code>
POST	<code>/projects/</code>	Create a new project	ADMIN, PROJECT_MANAGER	<code>{ name, description?, status? }</code>
PUT	<code>/projects/:id</code>	Edit an existing project	ADMIN, PROJECT_MANAGER *	<code>{ name, description, status }</code>
DELETE	<code>/projects/:id</code>	Delete a project	ADMIN, PROJECT_MANAGER *	URL param: <code>id</code>

(Note: PMs can only edit/delete projects they created. Members can only view projects they are assigned to.)

Project Members (/api/projects/:id/members)

Method	Endpoint	Description	Role Required	Body / Params
GET	/projects/:id/members	View members of a project	Any Authenticated	URL param: <code>id</code>
POST	/projects/:id/members	Add a user to a project	ADMIN, PROJECT_MANAGER	{ <code>userId</code> , <code>roleInProject?</code> }
DELETE	/projects/:id/members/:userId	Remove a member	ADMIN, PROJECT_MANAGER	URL params: <code>id</code> , <code>userId</code>

Tasks (/api/tasks)

Method	Endpoint	Description	Role Required	Body / Params
GET	/tasks/	Get tasks. Query by <code>?projectId=X</code>	Any Authenticated *	Query: <code>projectId</code>
POST	/tasks/	Create a new task in a project	ADMIN, PROJECT_MANAGER	{ <code>title</code> , <code>projectId</code> , <code>description?</code> , <code>priority?</code> , <code>dueDate?</code> , <code>assignedToId?</code> }
PUT	/tasks/:id	Update all task details	ADMIN, PROJECT_MANAGER	{ <code>title</code> , <code>description</code> , <code>priority</code> , <code>dueDate</code> , <code>assignedToId</code> , <code>status</code> }
DELETE	/tasks/:id	Delete a task	ADMIN, PROJECT_MANAGER	URL param: <code>id</code>
PATCH	/tasks/:id/progress	Update just the task status/progress	Any Authenticated *	{ <code>status</code> } (TODO, IN_PROGRESS, IN_REVIEW, DONE)

(Note: Team Members only see their own assigned tasks, and can only update the progress of tasks assigned to them.)

Task Comments (/api/tasks/:id/comments)

Method	Endpoint	Description	Role Required	Body / Params
GET	/tasks/:id/comments	List all comments on a task	Any Authenticated	URL param: <code>id</code>
POST	/tasks/:id/comments	Add a comment to a task	Any Authenticated	{ <code>content</code> }

Activity Logs (/api/activity)

Method	Endpoint	Description	Role Required	Body / Params
GET	/activity/	View system-wide activity logs	ADMIN	None
